

AUTUMN TERM 2023 - YEAR ELEVEN

<p>ENGLISH</p>	<p>Students will begin the year by completing their spoken language GCSE assessment. Continuing the preparation they began at the end of Year Ten, pupils will be presenting formally to their class and responding to questions in order to gain a Spoken Language grade alongside their English Language GCSE. Revision of the English Language exams will also be taking place.</p> <p>Following this, students will begin to study their final GCSE text 'A Christmas Carol', exploring character and the ways in which the text reflects its context. Students will explore Dickens' intentions and purpose in writing this famous story. There will also be time set aside for revising key moments, themes and characters from 'An Inspector Calls' and 'Macbeth'. Pupils will hone their essay writing skills and refine their ability to write critically about a text.</p>
<p>MATHEMATICS</p>	<p>At the start of Year Eleven, students will study the following units of work:</p> <ul style="list-style-type: none"> • Expanding and factorising • Gradients and lines • Working in different dimensions • Multiplicative reasoning • Manipulating expressions <p>Greater detail about the content of the unit, keywords and individual objectives can be found on the maths curriculum page of the school website in the knowledge organisers section.</p>
<p>SCIENCE</p>	<p>Biology: This term, students will be studying exchange in transport and animals. They will be looking at the structure of the lungs and heart. Students will also be learning about aerobic and anaerobic respiration.</p> <p>Chemistry: Students will study fuels from crude oil and the effect of these fuels on the environment. They will then develop their knowledge of how the atmosphere on Earth has changed and the impact of these changes on the climate. Those following the separate science course will also study hydrocarbons and qualitative and quantitative analysis.</p> <p>Physics: This term students will further develop their knowledge of forces, looking at forces and matter and energy and forces. Students will then develop their knowledge of electricity, looking at how electricity is supplied and used in different circuits and about static electricity.</p>
<p>ART & DESIGN</p>	<p>The Art and Design GCSE is made up of two elements: portfolio work (coursework) and the final exam. The portfolio work will be created in Year 10 and the first term of Year Eleven during lesson time. It is, therefore, crucial that work is kept up to date as it accounts for 60% of their overall GCSE. Over the course of this term, students will be working on the 'Manmade Structures' project, focusing on media tests and a final piece which will be conducted in the half term before Christmas in exam conditions.</p> <p>Students must ensure all coursework (Natural Forms and Manmade Structures) is completed this term, ready for the exam to begin in January. Their coursework will need to be submitted to the Art department in January.</p>

COMPUTER SCIENCE	Students in Year Eleven will be developing the skills for their exam components. The areas of study will cover all of the computer science theory that is required for the written paper. These include algorithm design and problem solving, data representation, data storage, databases, hardware and software, networks and data transmission, programming, security, the internet and ethics. The next part of the curriculum will cover the content needed for component two; these are computer science theory, algorithm design and practical application. The final area covered this year will be programming in Python. Students will develop their problem-solving skills, programming, software development, implementation, testing and evaluation.
CREATIVE MEDIA	Students will develop their understanding of the basics of interactive multimedia products for the creative and digital media sector. They will learn where and why both are used and what features are needed for a given purpose. It will enable students to interpret a client brief and to use time frames, deadlines and preparation techniques as part of the planning and creation process when creating any of these products.
DESIGN AND TECHNOLOGY	Year Eleven students will officially commence their non-examined assessment, which is 50% of their final GCSE grade. Within the assessment, students will undertake independent research tasks, design generation and development, all focused from one of the three contextual challenges set by AQA with a focus on one client and target market.
DRAMA	This term, students will complete their Component 1 non-examined assessment, which is worth 40% of their GCSE. Students will be expected to work in small groups (selected by the teacher) and respond to one of the exam board selected stimuli. Students will be expected to make a significant contribution to the response, creation and development of a piece of theatre, before finally performing under assessment conditions. As part of the NEA, students will need to complete a portfolio of evidence and write an evaluation of their final performance.
ENTERPRISE AND MARKETING	Students are continuing with their RO69 coursework. Students will be using their branding and promotional methods created from last year to start to design their pitches on their enterprise scenario. Students will then have a practice pitch to peers before they deliver their professional pitch which will last between 5-10 minutes. Students will then begin to start the examination content in December.
FRENCH	Students will continue GCSE theme two: discussing family holidays to different countries, where to stay and things to do on holiday and disasters abroad. They will then look at towns/local regions, things that you can do in your local area, positives and negatives about their towns and where they might like to live in the future. Grammatical concepts this term include articles, the conditional and future tenses, comparatives and superlatives, modal verbs plus infinitive, and direct object pronouns.

AUTUMN TERM 2023 - YEAR ELEVEN

<p>GEOGRAPHY</p>	<p>Students will continue their studies of Paper 1: Section C – Physical landscapes of the UK with a focus on coastal landscapes of the UK and Paper 3: Familiar fieldwork. The coastal topic will focus on physical processes that shape the UK’s coastal landscapes and how they can be managed to reduce erosion. Students will visit Southwold to experience the geography they are studying and support Paper 3: Section B, by conducting a geographical enquiry about the effectiveness of coastal management found here.</p> <p>There will be an even greater emphasis on extended writing and application of geographical skills and exam technique.</p>
<p>HISTORY</p>	<p>Students will complete their investigation into ‘Russia c1894-1945’ before embarking on the final unit of study on the GCSE course: ‘Norman England c1066-1100’. Areas of focus include the conquest and subsequent control of England, life in England under the Normans, the church and monasticism and a mini study on ‘Wales and the Norman Conquest’. Students will continue to refine their skills of analysis, source evaluation and extended writing as we move closer to the final examinations in Summer 2024.</p>
<p>HEALTH & SOCIAL CARE</p>	<p>Students will start their exam revision on RO32: Principles of care in health and social care settings. Students will gain an understanding of the rights of service users in health and social care settings, understand the person-centred values, understand effective communication and also learn about the importance of protecting service users and service providers in health and social care settings.</p>
<p>HOSPITALITY & CATERING</p>	<p>In Year Eleven, students will start to work towards completing the Non-Examined Assessment (NEA) for unit 2. The assessment is broken down into theory and practical sessions. All students will focus on ensuring all theory sections of their NEA are completed to the highest standard.</p>
<p>LIFE SKILLS</p>	<p>The first topic, ‘Health and Wellbeing’, will focus on building skills for the future. Self-efficacy, stress management and future opportunities will encompass effective, independent revision strategies and techniques, developing perseverance and resilience, and balancing ambition with realistic expectations, setting students up for the challenges of the year ahead. Within the statutory relationships topic this term, students will focus on personal values, assertive communication and relationship challenges and abuse. Effective communication within relationships is also a key focus this term, including handling unwanted attention and how to challenge harassment and stalking. How to recognise unhealthy, exploitative and abusive relationships will be explored, guiding students in how to access support and guidance to keep themselves safe.</p>
<p>MUSIC</p>	<p>During the first term of Year Eleven, students will be revisiting the four areas of study on which the exam is based: The Concerto through Time, Rhythms of the World, Film Music and Conventions of Pop, through a range of listening activities. Alongside this, students will be working on composition techniques in preparation for their NEA as well as preparing for a solo performance.</p>

AUTUMN TERM 2023 - YEAR ELEVEN

PHYSICAL EDUCATION (all students)	Students will develop and apply their skills, knowledge of tactics and officiating in a variety of sporting activities. They will have the opportunity to choose some of the practical activities they participate in. Students will be encouraged to consider which activities they will participate in post-16 and look at the options open to them. Physical Education as a method to maintain health and well-being will be an important focus for all Year Eleven students.
PHYSICAL EDUCATION (GCSE)	Students will study the paper two requirements: engagement patterns of different social groups and commercialisation of physical activity and sport. They will also be assessed in a variety of sports which accounts for 30% of the final grade. Students will participate in a practice moderation which is closely aligned to the practical moderation day that will take place in the spring/summer term.
PSYCHOLOGY	Students study the topic 'Perception' in the Autumn term. We explore the difference between sensation and perception and how visual illusions work. Students will revisit the nature versus nurture debate when studying their influences on perception. Whilst studying 'Brain and neuropsychology' in the second half term, students gain the necessary understanding of the brain, synaptic transmission and brain scanning techniques that are crucial for the next topic of psychological problems. Students explore the different structures in the brain, what they do and what happens when they are damaged. Prior knowledge from Biology lessons will help form the foundations of this topic.
RELIGION, PHILOSOPHY AND ETHICS	Throughout Year Eleven, students will carry out bite-sized investigations/mini-projects during their daily Act of Worship, which explore how different worldviews, both religious and non-religious, guide people in their lives. Students will consider big questions like 'What does it mean to be human?' and investigate case studies of social activism to discover why some people are driven by their beliefs in the search for peace and justice. Students will also explore their own views on a variety of moral and ethical dilemmas such as the ethics of driverless cars, the development of artificial intelligence, and the use of genetic engineering. GCSE students will carry out an in-depth study of their conclusive topics: Islamic beliefs and practices (Paper 1 content).
SPANISH	Students will begin the term by moving onto the fifth module of their GCSE course. As part of this module, students will learn more about the geography of Spain, how to ask for and understand directions, how to talk and write about the places in their town, any problems there are and to how describe a visit in the past. Students will then complete a speaking assessment before moving onto the sixth module of their GCSE course, which will include topics such as Spanish festivals, food and drink and daily routines.
SPORTS STUDIES	Students will be starting the examination unit R184: Contemporary issues in sport. They will be learning about issues affecting participation, promoting sporting values, hosting a major sporting event, roles of the NGB and technology in sports.
TRAVEL & TOURISM	In Year Eleven, students will be able to describe the type and purpose of different travel and tourism organisations and how the purpose of each organisation contributes to the sector. They will learn how the different types of ownership affects the function and aims of an organisation and how these organisations work together and interrelate.

We encourage staff to be innovative within their subject areas and seize topical opportunities as they arise, therefore aspects of the taught curriculum may differ from the one which is published.
